The C2C and CREST projects are made possible with funding from the Institute of Museum and Library Services.
CREST members are equipped with basic “go kits” of safety and triage supplies in the event that they are mobilized for response.

CREST members help facilitate the formation of (ACREN) regional response teams in their areas.

Flooding?  
Hurricanes?  
Broken Pipes?  
Wind damage?  
Insect infestation?  
Fire, smoke or soot damage?  
WE CAN HELP!

CREST is a statewide disaster response team established as a recovery and preservation resource for any disaster affected museum, library, and historic site in the North Carolina.

CREST maintains a large cache of safety & recovery supplies in Raleigh. These supplies can be mobilized quickly to aid in disaster response across the state.

A focus of the CREST team is specialized team training to encourage a unified and safe approach to artifact recovery efforts.
